MALCOM KIPKEMOI

Nairobi, Kenya

PROFESSIONAL SUMMARY

Talented Software Engineer with strong technical abilities and problem-solving skills. Adept at gathering requirements, designing systems, and optimizing code for efficiency. Experienced in developing and deploying software solutions that meet business needs. Proficient in web and software development, working collaboratively in teams to deliver high-quality products. Passionate about enhancing user experiences through responsive and secure applications.

EXPERIENCE

Social Media Manager & Digital Content Developer – Bizz.ke, Kericho, Kenya (April 2024 – April 2025)

- Content Creation & Brand Strategy: Designed and deployed high-impact, responsive social media content (graphics, videos, and copy) to boost engagement and brand visibility across Facebook, TikTok and LinkedIn.
- Data-Driven Campaigns: Developed and executed platform-specific social media strategies, using analytics tools such as Meta Insights, Google Analytics to track KPIs, refine content, and grow audiences by 50% over 6 Months.
- Digital Marketing Integration: Leveraged software development principles to optimize marketing workflows, automate reporting, and implement A/B testing for campaigns improving ROI by 20%
- Cross-Functional Collaboration: Partnered with design and dev teams to align social content with UX/UI best practices, ensuring seamless user journeys from social platforms to company products**.**

ICT Officer – Ministry of Roads and Transport, State Department for Roads (April 2025 – August 2025)

- Network Administration: Configured and troubleshot Ethernet cables, switches, and routers (Cisco), ensuring secure and reliable connectivity across the department's ICT infrastructure.
- Systems Support & Maintenance: Installed and updated operating systems (Windows 10/11), Microsoft Office Suite, antivirus tools (ESET, Kaspersky), and specialized software such as IFMIS to optimize workstation performance.
- Hardware & User Support: Set up new computer workstations, configured and maintained printers, and provided technical assistance to staff improving efficiency and minimizing downtime.
- Virtual & Physical Meeting Support: Managed boardroom setups and online conferencing tools (Zoom, Google Meet, Webex), integrating projectors and smart displays to facilitate seamless communication.
- Data & Security Compliance: Implemented data backup protocols, adhered to ICT security standards, and ensured software licensing compliance across the department.

SKILLS

- Software development using **HTML, JavaScript, React, PHP, and Java**
- Front-end frameworks for UI/UX optimization
- Adherence to best coding practices and standards
- Collaboration with cross-functional teams
- Optimization of website speed and responsiveness
- Application of modern cybersecurity practices
- Software lifecycle development and deployment
- Troubleshooting and debugging

CERTIFICATIONS & TRAINING

- Digital Product Development Certification *(2024)*
- Getting Started with Full Stack Java Development *(2025)*
- Data analysis Certification *(2024)*
- Cyber Security Certification *(2023)*
- Peer counselling Certification *(2023)*
- Taifa Teule Leadership Experience Certification *(2023)*

PROJECTS

- **Dairy Farming Management System** – Designed and developed a web-based system to manage dairy farming activities using PHP, HTML, CSS, JavaScript, and Bootstrap. Included features for livestock records, milk production tracking, and financial reports.

- **Medilink System** – Designed and developed a secure, centralized database system to store and manage patient medical records. Built with PHP, PostgreSQL, React and HIPAA standards, the system enables authorized healthcare providers to access patient history, diagnoses, prescriptions, and test results efficiently, improving accuracy and continuity of care.

LANGUAGES

- **English** – Fluent
- **Kiswahili** – Native
